

M 383

## easy modularity

Few elements to combine for multiple furnishing solutions.

## Privacy with elegance

The M 383 sofas were conceived for open-plan offices, where they provide sheltered, private spaces in busy or hectic surroundings. This makes them a perfect place to withdraw for concentrated work or small meetings.

M 383

The side and back panels are a distinguishing characteristic of the sofas Oasis, helping to shield sitters both visually and acoustically and creating a sense of calm and privacy. The thin panels enable an efficient use of space. Available with high back and low back.

## high back & low back schienale alto e basso

## one module many solutions

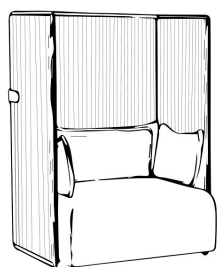

With M 383 all the configurations are obtained combining just one basic module. Modularity becomes a clear competitive advantage, both in terms of minor production cost and stock level.

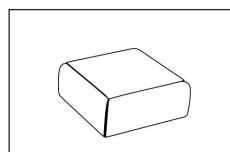

## Module

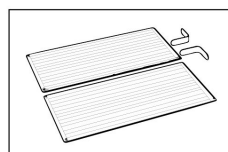

- Seat** Inner frame in chipboard with plywood elements. Padding in polyurethane (PU) foam.
- Back and sides:** Inner structure in MDF. Padding in polyurethane (PU) foam.
- Feet** Height adjustable plastic feet.
